REASONS FOR ALLOWANCE

1. Applicant's preliminary amendment originally filed on December 11, 2001, which added claims 198-210 was never matched with the case and hence was not considered in the First Office Action. These claims have now been examined.

2. The following is an examiner's statement of reasons for allowance: As previously noted, independent claims 151, 163, and 186 include limitations directed to the use of a programmable register in the memory device which stores a value that indicates an amount of time to transpire before the memory outputs data, the value stored in the register in response to a first operation code; and the output driver circuitry outputting a first portion of the data synchronous to a first transition of the clock signal and a second portion of the data synchronous to a second transition of the clock signal. This combination of limitations does not appear to be present in the prior art and would not have been obvious.

Independent claims 176 and 198 include limitations directed to a first operation code initiating access to the programmable register to store a binary value which is stored in response to the first operation code, in combination with the memory device outputting a first portion of the data synchronous to a first transition of the clock signal and a second portion of the data synchronous to a second transition of the clock signal. This combination of limitations does not appear to be present in the prior art and would not have been obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
